RM'S: An AI-Integrated Inventory and E-Commerce Management System with Real-Time Demand Forecasting and Enhanced Distribution for REMHART is a digital platform designed to streamline inventory management, sales monitoring, and distribution processes.

The system integrates real-time inventory tracking, online ordering, and AI-powered demand forecasting using historical sales data to help REMHART make informed business decisions. RM'S allows users to monitor stock levels, manage product records, track transactions, and generate accurate forecasts to prevent overstocking and stock shortages.

With its user-friendly interface and centralized dashboard, RM'S improves operational efficiency, enhances distribution planning, and supports data-driven growth for REMHART.

RM'S USER MANUAL

ADMIN

The Admin module is designed to provide full control over the system's core operations, including inventory management, product monitoring, user account management, sales tracking, and AI-driven demand forecasting. Through the centralized dashboard, administrators can view real-time stock levels, analyze sales performance, generate reports, and monitor distribution activities.

This manual serves as a step-by-step guide to help administrators efficiently navigate the system, manage data, and utilize forecasting tools to support informed business decisions and improve overall operational performance.

ACCESSING THE SYSTEM

Step 1: Open the System

- Launch your web browser.
- Enter the system URL in the address bar.
- You will be directed to the Home Page (Figure 10).

LOGGING IN

Step 1:

- Enter your registered email address.
- Enter your password.

Step 2:

- Click Login.

ADMIN

ADMIN DASHBOARD OVERVIEW

- **Sidebar Navigation:** Access inventory, security, AI insights, and stock monitoring.
- **Total Items:** View current inventory count and full item list.
- **Stock Alerts:** Monitor Low Stock and Near Expiry tiles for items requiring action.
- **Recent Orders:** Track processed and pending sales.
- **Sales Trend:** Analyze performance over time using the interactive bar chart.
- **Demand Forecast:** Review AI-driven predictions for future stock needs.

PRODUCT MANAGEMENT

- **Accessing the List:** Open the Product Inventory Management menu in the sidebar and select Product List.
- **Monitoring Status:** View real-time counters for Total Items, Active products, Low Stock alerts, and the number of Categories.
- **Adding Products:** Click the + Add Product button to enter a new item into the system.
- **Exporting Data:** Use the Export button to generate a report of the current inventory list.

ADMIN

- **Locating Items:** Use the Search Bar to find products by name, brand, or SKU.
- **Filtering Results:** Use the Category and Brand dropdown menus to narrow down the visible items.
- **Reviewing Product Details:** Each entry displays the product name, description, SKU, and price for easy management.

ADDING A NEW PRODUCT

The screenshot shows the 'Add New Product' form. It includes fields for PRODUCT NAME, PRODUCT IMAGE (with a 'Click to upload' button), SKU, BRAND, CATEGORY, QTY/BUNDLE, WHOLESALE PRICE, UNIT PRICE, and UNIT AMOUNT. The form is designed to capture all necessary details for a new product entry.

- **Initiate:** Click the red + Add Product button on the main Product Management page.
- **Enter Details:** Fill in the required fields in the pop-up form, including Product Name, SKU, Brand, and Category.
- **Upload Media:** Click the Product Image area to upload a visual of the item.
- **Set Pricing & Quantity:** Enter the Wholesale Price, Unit Price, and Qty/Bundle information.
- **Define Units:** Specify the Unit Amount and Unit type for the product.
- **Finalize:** Submit the form to make the product visible in both the inventory and product catalog.

ADMIN

INVENTORY LIST (STOCK TRACKING)

- **Access Inventory:** Select Inventory List from the sidebar to view current stock levels and details.
- **Monitor Stock Levels:** View real-time quantities for each product, listed by Bundles and Units.
- **Track Expiry & Location:** Check the Expiry Status (e.g., "Good") and the assigned Location (e.g., "Warehouse") for every item.
- **Identify Suppliers:** View the designated Supplier linked to each inventory batch.
- **Advanced Search:** Filter the list by Product/SKU, Supplier, or Location to isolate specific stock.
- **Manage Entries:** Use the Actions column to edit specific inventory records or click Export Report for a full data download.

INVENTORY PRODUCT MANAGEMENT GUIDE

ADMIN

ADJUSTING & EDITING STOCK

- **Access Inventory:** Click on Inventory List under the Product Inventory Management sidebar menu to view all current stock.
 - **Search and Filter:** Locate specific items using the Search Bar (by product, SKU, or supplier) or filter by Supplier and Location.
 - **Monitor Stock Levels:** View real-time data for each item, including the number of Bundles/Units, Supplier name, and Expiry Status.
 - **Track Storage:** Check the specific Location (e.g., "warehouse") assigned to each product entry.
 - **Export Data:** Click the Export Report button to download a complete record of the current inventory.
 - **Initiate Edits:** Select the Edit icon (pencil) under the Actions column for a specific product to modify its details.
 - **Update Information:** Use the Edit Inventory form to change the Supplier, Expiry Date, or Storage Location.
 - **Save Changes:** Click Save Changes to update the product metadata without affecting the actual stock levels.
- **Edit Metadata:** Click the pencil icon under Actions to modify the Supplier, Expiry Date, or Storage Location.
 - **Adjust Stock Levels:** Click the Stock button to open the Adjust Stock form for audits, loss, or damage.
 - **Update Quantities:** View the Current Stock, enter the New Quantity, and select an Adjustment Reason.
 - **Finalize Changes:** Click Save Changes (for metadata) or Update Stock (for quantity) to apply your edits.

ADMIN

USER MANAGEMENT GUIDE

- **Accessing the Module:** Navigate to the Access Control & Security dropdown in the sidebar and select User Management.
- **System Overview:** View real-time counts of active internal users, categorized by roles such as Admins, Stock Managers, and Sales Personnel.
- **Switching User Lists:** Use the tabs to toggle between Inventory Users (internal staff) and E-commerce Customers.
- **Registering a New User:** Enter a unique Username and a valid Email Address. Assign a specific Role (e.g., Admin, Sales) from the dropdown menu to define system permissions. Create and confirm a secure Password. Click + Create User to finalize the account registration.
- **Security & Workflow:** Ensure proper departmental separation by assigning correct access levels to users in sales, warehousing, or admin operations.

ACTIVITY LOGS (SYSTEM AUDIT TRAIL)

ADMIN

- **Purpose:** Records every user action to support auditing, accountability, and security monitoring.
- **Access:** Navigate to Access Control & Security in the sidebar and select Activity Logs.
- **Log Categories:** Toggle between different log types to view specific data:
- **User Activity:** Tracks login/logout events and module access.
- **Stock Adjustments:** Monitors manual changes to inventory quantities.
- **Stock Movements:** Records the flow of items within the system.
- **Data Captured:** Each entry provides the unique ID, the User involved, the specific Action taken, detailed Description, and a Timestamp.
- **Search & Organize:** Use the Search records field to find specific entries or adjust the "Show entries" dropdown to change the number of visible rows.
- **Data Management:**
 - Export CSV: Click this button to download a copy of the logs for external auditing.
 - Clear Logs: Use this option (with caution) to remove old log history from the display.

AI INSIGHTS & DEMAND FORECASTING

- **Forecast Future Needs:** Use the Demand Forecasting module to analyze past sales and predict upcoming product requirements.
- **Risk Monitoring:** Identify products with a Stockout Risk, Overstock status, or Healthy levels via the top summary cards.
- **AI Recommendations:** Review automated reorder suggestions (e.g., "Reorder at least 136 bundles") based on predicted 6-month demand.
- **Visual Analysis:** Click View Graph next to any product to see a visual trend analysis of demand.

ADMIN

- **Access Trend Analysis:** Select Trend Analysis under the AI Insights dropdown in the sidebar to view long-term sales performance.
- **Select Product:** Use the Product Selection dropdown to choose a specific item for data visualization.
- **Analyze Sales Patterns:** Review the Monthly Sales Trend graph to identify growth patterns, seasonal shifts, or declining trends.
- **Export Trend Data:** Click the Export Data button to download historical sales figures for external planning.
- **Access Demand Forecasting:** Select Demand Forecasting under AI Insights to view predictions for future product needs.
- **Monitor Risk Status:** Review summary cards for Stockout Risk, Overstock, and Healthy inventory levels.
- **Follow AI Recommendations:** Check the AI Recommendation column for suggested reorder quantities based on 6-month predictions.
- **Visualize Predictions:** Click View Graph next to any product in the forecast list to see predicted demand trends alongside current stock.

ADMIN

- **Purpose:** Provides real-time visibility into inventory health, critical levels, and total valuation for faster operational decision-making.
- **Access:** Navigate to the Real-Time Stock Monitoring dropdown in the sidebar and select Stock Overview.
- **Inventory Health:** Monitor the "Inventory Health" card to see the percentage of optimal items versus total SKUs (currently 100% Healthy).
- **Critical Alerts:** Check the "Attention Needed" card for immediate counts of items that are Low on stock or Expiring.
- **Valuation Tracking:** View the Total Inventory Value (calculated as Unit Price × Current Stock) in the top right summary card.
- **Stock Position Analysis:** Review specific Product Details including SKU and category. Monitor Current Stock quantities and their Status (e.g., Optimal). Track the individual Asset Value and unit price for every item in the list.
- **Data Actions:** Use the Print or Export buttons to generate physical or digital reports of the current stock position.

ADMIN

STOCK ALERTS & MONITORING GUIDE

- **Accessing Alerts:** Navigate to the Real-Time Stock Monitoring dropdown in the sidebar and select Stock Alerts.
- **Monitoring Low Stock:** Select the Low Stock tab to view items that have reached their minimum quantity threshold.
- **Checking Expiry Dates:** Switch to the Expiry Alerts tab to identify products nearing their expiration.
- **Reviewing Product Status:** For each alert, review the Product Name, SKU, Current Stock, and the set Threshold level.
- **Managing Settings:** Use the Settings tab within the module to configure or adjust minimum stock thresholds for specific items.
- **Exporting Reports:** Click the Export Report button to download a summary of all active inventory alerts.
- **Gauging Overall Health:** Use the Stock Overview page to see a high-level summary of Inventory Health and total items requiring attention.

ADMIN

REORDER SUGGESTIONS GUIDE

- **Accessing Suggestions:** Select Orders Management under the E-commerce dropdown in the sidebar.
- **Low Stock Recommendations:** Review the Low Stock Reorder Recommendations section for products that have fallen below their manual reorder threshold.
- **Sales-Based Insights:** Monitor the Sales-Based Reorder Suggestions section for automated restocking alerts calculated from current sales trends and predicted demand.
- **Creating Purchase Orders:** Select specific recommended items and click Create PO for Selected Items to initiate the replenishment process.
- **Efficiency and Monitoring:** Use these automated tools to reduce manual stock monitoring and prevent stockouts for high-velocity items.

ADMIN

STOCK ALERTS & MONITORING GUIDE

- **Accessing Alerts:** Navigate to the Real-Time Stock Monitoring dropdown in the sidebar and select Stock Alerts.
- **Monitoring Low Stock:** Select the Low Stock tab to view items that have reached their minimum quantity threshold.
- **Checking Expiry Dates:** Switch to the Expiry Alerts tab to identify products nearing their expiration.
- **Reviewing Product Status:** For each alert, review the Product Name, SKU, Current Stock, and the set Threshold level.
- **Managing Settings:** Use the Settings tab within the module to configure or adjust minimum stock thresholds for specific items.
- **Exporting Reports:** Click the Export Report button to download a summary of all active inventory alerts.
- **Gauging Overall Health:** Use the Stock Overview page to see a high-level summary of Inventory Health and total items requiring attention.

ADMIN

PURCHASE ORDERS & PROCUREMENT GUIDE

- **Navigate to Orders:** Select Orders Management under the E-commerce dropdown in the sidebar.
- **Initiate an Order:** Use the Create Purchase Order card to start a new procurement request.
- **Select a Vendor:** Choose a supplier from the Supplier dropdown menu.
- **Add Products:** Click + Add Product Line to specify the items and quantities needed for the order.
- **Submit Request:** Review the Total Amount and click the Create Order button to finalize.
- **Monitor Progress:** Track Recent Orders and filter them by status, such as Pending, Approved, Delivered, or Canceled.
- **View Suggestions:** Click View Order Suggestions to see automated recommendations for low-stock items.

ADMIN

STOCK ALERTS & MONITORING GUIDE

- **Accessing Alerts:** Navigate to the Real-Time Stock Monitoring dropdown in the sidebar and select Stock Alerts.
- **Monitoring Low Stock:** Select the Low Stock tab to view items that have reached their minimum quantity threshold.
- **Checking Expiry Dates:** Switch to the Expiry Alerts tab to identify products nearing their expiration.
- **Reviewing Product Status:** For each alert, review the Product Name, SKU, Current Stock, and the set Threshold level.
- **Managing Settings:** Use the Settings tab within the module to configure or adjust minimum stock thresholds for specific items.
- **Exporting Reports:** Click the Export Report button to download a summary of all active inventory alerts.
- **Gauging Overall Health:** Use the Stock Overview page to see a high-level summary of Inventory Health and total items requiring attention.

ADMIN

PERFORMANCE ANALYSIS & REPORTING GUIDE

- **Accessing Performance Data:** Navigate to the Suppliers & Orders dropdown in the sidebar and select Performance Analysis.
- **Supplier Performance Overview:** Review the Performance Overview table to monitor Total Deliveries, On-Time Rate, and Quality Score for each vendor.
- **Detailed Metric Deep-Dive:** Use the Detailed Metrics section to analyze specific stats such as Total Orders, Late Deliveries, Complaints, and Average Delivery times.
- **Filter and Search:** Select a specific vendor from the Select a Supplier... dropdown or use the Search suppliers... field to isolate performance data.
- **Operational Efficiency:** Use these insights to identify best-selling items, flag underperforming SKUs, and evaluate overall market behavior for strategic improvement.
- **Audit Trail:** Regularly check the System Logs under Access Control & Security to trace user activities and stock movements for full accountability.
- **Centralized Overview:** Utilize the Stock Overview dashboard for real-time visibility into current inventory health and total valuation.

ADMIN

STOCK MOVEMENT HISTORY [TRACEABILITY GUIDE]

- **Access the History:** Navigate to the Stock Movement Tracking dropdown in the sidebar and select Stock Movement History.
- **Monitor Inbound/Outbound:** Review the top summary cards for Total Stock In (Inbound Volume), Total Stock Out (Outbound Volume), and the Net Change (Inventory Delta).
- **Trace Inventory Flow:** Use the main list to view detailed logs of every inventory change, including transfers, deliveries, and withdrawals.
- **Identify Discrepancies:** Review the Quantity, Reason (e.g., initial stock), and the User responsible for each movement to verify stock count integrity.
- **Audit Actions:** Track the specific Type (In/Out), Date, and Timestamp for every recorded movement ID to ensure complete traceability.
- **Filter and Search:** Use the search field to find records by ID, User, or Reason, or filter by All Movements to isolate specific activity.
- **Export Data:** Click the Export History button to download a full audit trail of all inventory changes for external review.

ADMIN

STOCK ADJUSTMENTS HISTORY [MANUAL CORRECTION LOGS]

- **Access the Module:** Select Stock Adjustment History under the Stock Movement Tracking menu in the sidebar.
- **Monitor Adjustments:** Use the summary cards to view Positive Adjustments (stock added), Negative Adjustments (stock removed), and the overall Net Change (total impact).
- **Audit Manual Changes:** Review the log to trace every manual inventory correction, including the Adjustment ID, specific Inventory Ref, and the Quantity changed.
- **Verify Accountability:** Check the Adjusted By and Date columns to see which user performed the correction and when it occurred.
- **Track Reasons:** Examine the Reason column to identify why a change was made, such as damage, loss, returns, or corrections.
- **Search and Filter:** Use the Search bar to find specific records by ID, User, or Reason, or use the dropdowns to filter by Type and Time.
- **Export Reports:** Click the Export Report button to download a complete audit trail of all manual inventory corrections.

ADMIN

STOCK MOVEMENT HISTORY (TRACEABILITY GUIDE)

- **Access the History:** Navigate to the Stock Movement Tracking dropdown in the sidebar and select Stock Movement History.
- **Monitor Inbound/Outbound:** Review the top summary cards for Total Stock In (Inbound Volume), Total Stock Out (Outbound Volume), and the Net Change (Inventory Delta).
- **Trace Inventory Flow:** Use the main list to view detailed logs of every inventory change, including transfers, deliveries, and withdrawals.
- **Identify Discrepancies:** Review the Quantity, Reason (e.g., initial stock), and the User responsible for each movement to verify stock count integrity.
- **Audit Actions:** Track the specific Type (In/Out), Date, and Timestamp for every recorded movement ID to ensure complete traceability.
- **Filter and Search:** Use the search field to find records by ID, User, or Reason, or filter by All Movements to isolate specific activity.
- **Export Data:** Click the Export History button to download a full audit trail of all inventory changes for external review.

ADMIN

LOCATION DEMAND ANALYSIS: SALES BY LOCATION

- **Module Access:** Select Sales by Location under the Location Demand Analysis menu in the sidebar.
- **Geographic Performance:** View a list of products performance categorized by specific City/Municipality.
- **Sales Tracking:** Monitor the number of Units Sold for each item in a particular region.
- **Demand Levels:** Identify the Demand Level (e.g., "Low Demand") for products across different areas to optimize distribution efforts.
- **Revenue Insights:** Use this geographic breakdown to determine which routes generate the highest revenue and adjust logistics strategies accordingly.

SALES HEATMAP (GEOGRAPHIC VISUALIZATION)

ADMIN

- **Access the Heatmap:** Select Sales Heatmap under the Location Demand Analysis menu in the sidebar.
- **Visualize Performance:** View a geographic map that uses color-coding to highlight sales intensity across different regions.
- **Interpret Volume:** Use the Volume Legend to identify sales strength:
- **Deep Red:** High intensity (over 300 units).
- **Yellow/Orange:** Low to moderate intensity (0–100 units).
- **Filter Data:** Use the All Products dropdown to view the geographic performance of specific items.
- **Identify Top Areas:** Check the Top Municipalities card for a quick list of your strongest-performing regions.

SALES BY STORE & LOCATION ANALYSIS

- **Access Store Performance:** Navigate to the Location Demand Analysis menu in the sidebar and select Sales by Store.
- **Filter and Compare:** Use the Select Store dropdown and click Apply Filter to compare sales results across different branches or distribution points.
- **Monitor Core Metrics:** Review high-level cards for Unique Products, Total Units sold, Total Revenue, and the date of Last Activity per store.
- **Track Purchase History:** Use the Purchase History section to view an itemized list of specific products sold to each store.

ADMIN

- **Export Analytics:** Click the Export Report button to download a detailed performance summary for resource allocation and productivity evaluation.
- **Geographic Breakdown:** Use the Sales by Location tab to see product demand levels categorized by specific City/Municipality.
- **Visualize Peak Areas:** Access the Sales Heatmap to identify high-intensity sales regions using color-coded volume legends.

MANUAL INVENTORY ENTRY (STOCK REGISTRATION)

- **Access the Module:** Navigate to the Manual Entry & Docs dropdown in the sidebar and select Inventory Entry.
- **Purpose:** Use this feature to manually input new stock arrivals, process non-purchase order receipts, or handle corrections to existing stock.
- **Define Item Details:**
 - Select a Product:** Use the dropdown to choose the specific item from your catalog.
 - Assign a Supplier:** Select the vendor responsible for the stock arrival.
- **Set Expiry & Storage:** Enter the Expiry Date and the specific Storage Location (e.g., Aisle 4, Shelf B) to maintain organization.
- **Input Quantities:** Enter the Bundle Qty and define the Units Per Bundle to ensure accurate stock calculation.
- **System Integration:** Once submitted, these entries are immediately reflected in the system to ensure physical stock matches digital records.
- **Management Actions:** Use the Back to Inventory button to return to the main list after completing your entries.

ADMIN

- **Access Archived Records:** Navigate to the Manual Entry & Docs dropdown in the sidebar and select Archived.
- **Manage Inactive Items:** Use this module to view and manage expired or discontinued inventory that is no longer in active use.
- **Search and Filter:** Locate specific records by searching for a product name or SKU, or filter by reason and sort by date.
- **Preserve Historical Data:** Ensure important historical information remains accessible while decluttering active system modules.
- **Export Archives:** Click the Export Archive button to download a complete record of archived items for offline reference.
- **Manual Inventory Entry:** Select Inventory Entry under the Manual Entry & Docs menu to add existing stock or handle non-purchase order receipts.
- **Input mandatory details:** Product, Supplier, Bundle Qty, Units Per Bundle, Expiry Date, and Storage Location.
- Click the action button to ensure changes are accurately recorded and immediately reflected in the system.
- **Document Management:** Use the Document Upload feature to attach and store relevant paperwork related to manual entries and archived items.

- **Accessing the Module:** Navigate to the Manual Entry & Docs dropdown in the sidebar and select Document Upload.
- **Purpose:** Centralize and manage transaction documents such as invoices, receipts, and product records to prevent file loss.
- **Uploading Files:** Drag and drop files into the designated area or click Browse Files to select from your computer. Supported file formats include PDF, DOC, JPG, and PNG.
- **Indexing Records:** Select the appropriate Document Type from the dropdown menu. Enter an optional Reference ID to link the file to a specific system transaction.
- **Historical Preservation:** Use the Archived module to store inactive records for future reference while keeping active modules clear.
- **System Integration:** Use the Inventory Entry module to manually record new stock arrivals or updates, ensuring all physical changes are immediately reflected in the digital system.

- **Accessing Reports:** Navigate to the Reports & Analytics dropdown in the sidebar and select Reports Dashboard.
- **Filter Data:** Use the Start Date, End Date, and Category dropdowns and click Apply Filters to refine the displayed metrics.
- **Key Business Summaries:** Monitor the summary cards for real-time snapshots of Near-Expiry Products, Total Sales Records, and Wastage Reports.
- **Visualizing Performance:** Review the Sales Trend by Month chart to track bundles sold and identify seasonal peaks or performance shifts.
- **Exporting Data:** Click the green Export CSV button to download the consolidated report for offline analysis or documentation.
- **Audit and Compliance:**
 - Use the Stock Adjustment History to view audit trails for manual corrections, including reasons like damage or loss.
 - Review the Stock Movement History to trace every inbound and outbound change to identify discrepancies.
- **Decision Support:** Utilize the consolidated visuals to quickly gauge business health across sales, inventory, and operations for faster strategic decision-making.

- **Access Order Tracking:** Navigate to the E-commerce dropdown in the sidebar and select Orders Management.
- **Monitor Order Volume:** View real-time summary cards for Total Orders, Pending, Processing, Shipped, and Delivered counts.
- **Track Transaction Status:** Use the tabbed interface to filter specific customer orders by their current progress, including Cancelled orders.
- **Sync Inventory:** Use this module to ensure digital sales are automatically reconciled with physical stock levels to prevent discrepancies.
- **Manage Financials:** Access the G-Cash Payments Management sub-menu to oversee digital transaction proofs and reconciliations.
- **Configure Logistics:** Utilize Shipping Settings and Voucher Manager under the E-commerce menu to adjust delivery parameters and promotional offers.
- **Search and Export:** Locate specific customer transactions using the Search orders... bar and click Export to download order history reports.

GCASH PAYMENTS MANAGEMENT GUIDE

- **Access the Module:** Navigate to the E-commerce dropdown in the sidebar and select G-Cash Payments.
- **Verify Mobile Transactions:** Use this module to review and verify mobile wallet transactions from customer orders.
- **Monitor Payment Status:** Track real-time summary cards for Pending Review, Verified, and Rejected payments.
- **Transaction Tabs:** Use the categorized tabs—Pending, Verified, and Rejected—to organize and process transaction records efficiently.
- **Review Payment Details:** Examine individual logs including Order Details, GCash Info, Amount, and Date to ensure accurate reconciliation.
- **Maintain Financial Records:** Use verified statuses to update order progress and maintain a complete history of all digital customer purchases.
- **System Integration:** Seamlessly sync these digital payment records with overall E-commerce Management and Orders Management workflows to prevent inventory and financial discrepancies.

RM'S USER MANUAL

USER

The User module is designed to provide a simple and efficient way to manage daily transactions, place orders, and monitor product availability. Through an easy-to-navigate interface, users can browse products, check stock availability, submit orders, and track transaction history in real time.

This manual provides step-by-step instructions to help users navigate the system smoothly, perform transactions accurately, and maximize the features available within RM'S for faster and more organized operations.

ACCESSING THE SYSTEM

Open the System

- Launch your **web browser**.
- Enter the system **URL** in the address bar.
- You will be directed to the Home Page.

LOGGING IN

- Enter your registered **email address**.
- Enter your **password**.
- Click **Login**.

USER

REGISTERING A NEW ACCOUNT

- **Enter Username:** Choose a unique username for your login.
- **Provide Email:** Enter your official business email address.
- **Set Password:** Type a secure password and re-enter it in the Confirm field.
- **Accept Terms:** Click the checkbox to agree to the Terms of Partnership.
- **Submit:** Click the SUBMIT APPLICATION button.

BROWSE THE WHOLESALE CATALOG

- **Search & Filter:** Find items by name or filter by categories like Beauty & Wellbeing or Home Care.
- **View Pricing:** See wholesale prices and bundle quantities for each product.
- **Manage Orders:** Use the top menu to view My Orders, active Promotions, or contact Support.

USER

NAVIGATION & PRODUCT FILTERING

- **Select a Category:** On the left sidebar under "CATEGORIES," click the radio button for a specific group (e.g., Personal Care, Home Care) to view only those related products.
- **Set Price Range**
 - Enter your minimum budget in the "Min" box.
 - Enter your maximum budget in the "Max" box to narrow down results by cost.
- **Check Availability:** Tick the "In Stock Only" checkbox to hide items that are currently unavailable for purchase.
- **View Product Details:** Click on any product card to see the price per case, bundle quantity, and specific product descriptions.
- **Reset Filters:** Click the "Reset Filters" button at the bottom of the sidebar to clear all selections and return to the "All Products" view.

WHOLESALE CATALOG SORTING

USER

- **Find Sort Menu:** Locate the dropdown at the top right of the product grid.
- **Select "Sort: Popular":** Click the menu and choose this option to highlight best-selling or high-engagement items.
- **Choose Other Options:** Select Name (A-Z), Price: Low to High, or Price: High to Low to rearrange the list.
- **Automatic Update:** The catalog will instantly refresh to display products in your chosen order.

SHOPPING CART & CHECKOUT

- **Access Your Cart:** Click the Shopping Cart icon in the top right header to view your current selections.
- **Review Items:** Check the product names, quantities, and pricing details to ensure accuracy.
- **Modify Order:** Update item quantities or remove products as needed before proceeding.
- **Track Progress:** Follow the three-step checkout indicator at the top of the page.
- **Start Ordering:** If your cart is empty, click the "Start Ordering" button to return to the Wholesale Catalog.

USER

MANAGING MY ORDERS

- **Access Orders:** Click the "My Orders" tab in the top navigation bar to view your history.
- **Filter by Status:** Use the status tabs to organize your view by To Pay, To Ship, To Receive, Completed, or Cancelled.
- **Search Orders:** Enter an Order ID or Product Name in the search bar to find a specific transaction quickly.
- **Track Progress:** Check individual order details and statuses to stay updated on the fulfillment process.
- **Continue Shopping:** Click the "Continue Shopping" link to return to the product catalog at any time.

USER

VIEWING & MANAGING "TO PAY" ORDERS

- **Find Your Order:** Use the **Search bar** to look up a specific order by typing the **Order ID** (e.g., #11) or **Product Name** (e.g., AXE DEO). Click the **Search** button.
- **Review Order Details:** Check the order summary carefully, including:
 - **Items Ordered:** Confirm the product name, type (e.g., BUNDLE), price, and quantity.
 - **Payment Method:** Verify the selected payment option (e.g., GCash).
 - **Total Amount:** Review the Subtotal, Shipping fees, and the final **Total** to be paid.
- **Complete Payment:** If you are ready to pay, click the **[Complete Payment]** button. You will be redirected to complete the transaction.
- **Cancel Order:** If you no longer wish to proceed with the order, click the **[Cancel]** button.

SUBMITTING GCASH PAYMENT

USER

- **Review Order:** Confirm Order ID #11 and Total Amount (P3244.51).
- **Send Payment via GCash:**
 - **Option A:** Scan the QR code using the GCash app.
 - **Option B:** Send manually to **0949-727-4819** (RM Distribution).
- **Fill Out Details:**
 - **GCash Account Name:** Enter your registered GCash name.
 - **GCash Mobile Number:** Enter the number used for payment.
 - **Amount Sent:** Must match the order total.
 - **Proof of Payment:** Click **Choose File** to upload a screenshot (Image or PDF).
 - **Reference Number:** Optional, but helps speed up verification.
- **Submit:** Click **[Submit Payment]**. Payments are verified within 24 hours.

TRACKING "TO SHIP" ORDERS

- **Go to "To Ship":** Click the **To Ship** tab to see orders being prepared.
- **Check Status:** Look for the **PREPARING TO SHIP** tag—your order is being packed.
- **Review Details:** Confirm Order ID, items, quantity, and total amount.
- **Wait for Update:** Status will automatically move to **"To Receive"** once shipped.
- **Continue Shopping:** Click **[Continue Shopping]** to browse more products.

USER

TRACKING "TO RECEIVE" ORDERS

- **Go to "To Receive":** Click the **To Receive** tab to see orders out for delivery.
- **Check Status:** Look for the **OUT FOR DELIVERY** tag—your order is on its way.
- **Review Details:** Confirm Order ID, items, and total amount.
- **Prepare for Delivery:** Ensure someone is available to receive the package.
- **Contact Support (if needed):** Use the search bar to find order help.

VIEWING "COMPLETED" ORDERS

- **Go to "Completed":** Click the **Completed** tab to see all finished orders.
- **Review Past Orders:** Check Order ID, date placed, items purchased, and total amount.
- **View Payment Method:** See how you paid (e.g., Cash on Delivery).
- **Buy Again:** Click the **[Buy Again]** button to quickly reorder the same item.

USER

COMPLETING CHECKOUT

- **Review Delivery Address:** Confirm recipient name, contact number, and full address.
- **Check Order Items:** Verify item name, type (BUNDLE PACK), unit price, and quantity.
- **Add Message to Seller (Optional):** Type special instructions for packaging or delivery.
- **Select Shipping Method:** Choose **Standard Delivery** (RM Distribution Fleet/Partner).
- **Choose Payment Method:** Select one:
 - **Cash on Delivery** – Pay upon receiving.
 - **GCash E-Wallet** – QR-based payment.
 - **VISA** – Credit/Debit card online payment.
- **Apply Voucher (Optional):** Click **Select / Enter Code** to add a platform voucher.
- **Review Order Summary:** Check Subtotal, Shipping Fee, and Total Payment.
- **Place Order:** Click **[Place Order →]** to complete. All transactions are secured with 256-bit SSL encryption.

VIEWING "CANCELLED" ORDERS

- **Go to "To Ship":** Click the **To Ship** tab to see orders being prepared.
- **Check Status:** Look for the **PREPARING TO SHIP** tag—your order is being packed.
- **Review Details:** Confirm Order ID, items, quantity, and total amount.
- **Wait for Update:** Status will automatically move to **"To Receive"** once shipped.
- **Continue Shopping:** Click **[Continue Shopping]** to browse more products.
