RM'S:

AN AI-INTEGRATED INVENTORY AND E-COMMERCE MANAGEMENT SYSTEM FOR REAL-TIME DEMAND FORECASTING AND ENHANCED DISTRIBUTION AT REMHART: A UNILEVER PRODUCTS DISTRIBUTOR

Rhaj S. Madrona
Gwen M. Basconillo
Maria Hanah G. Mendoza

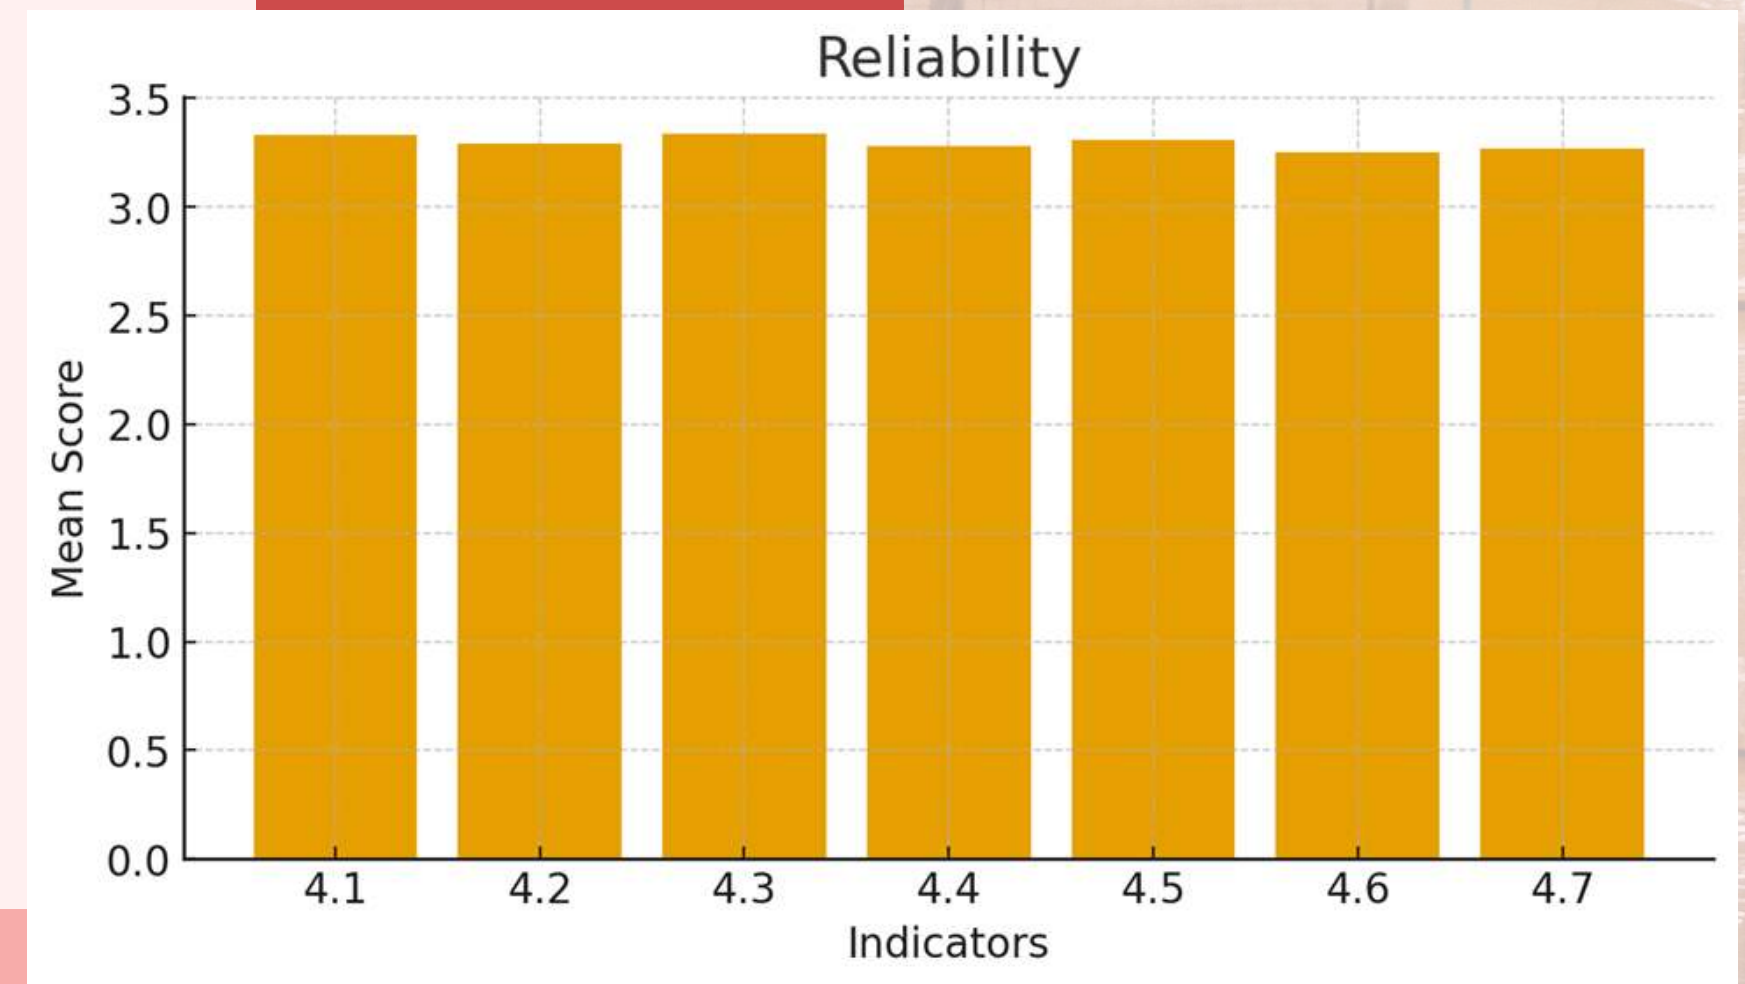

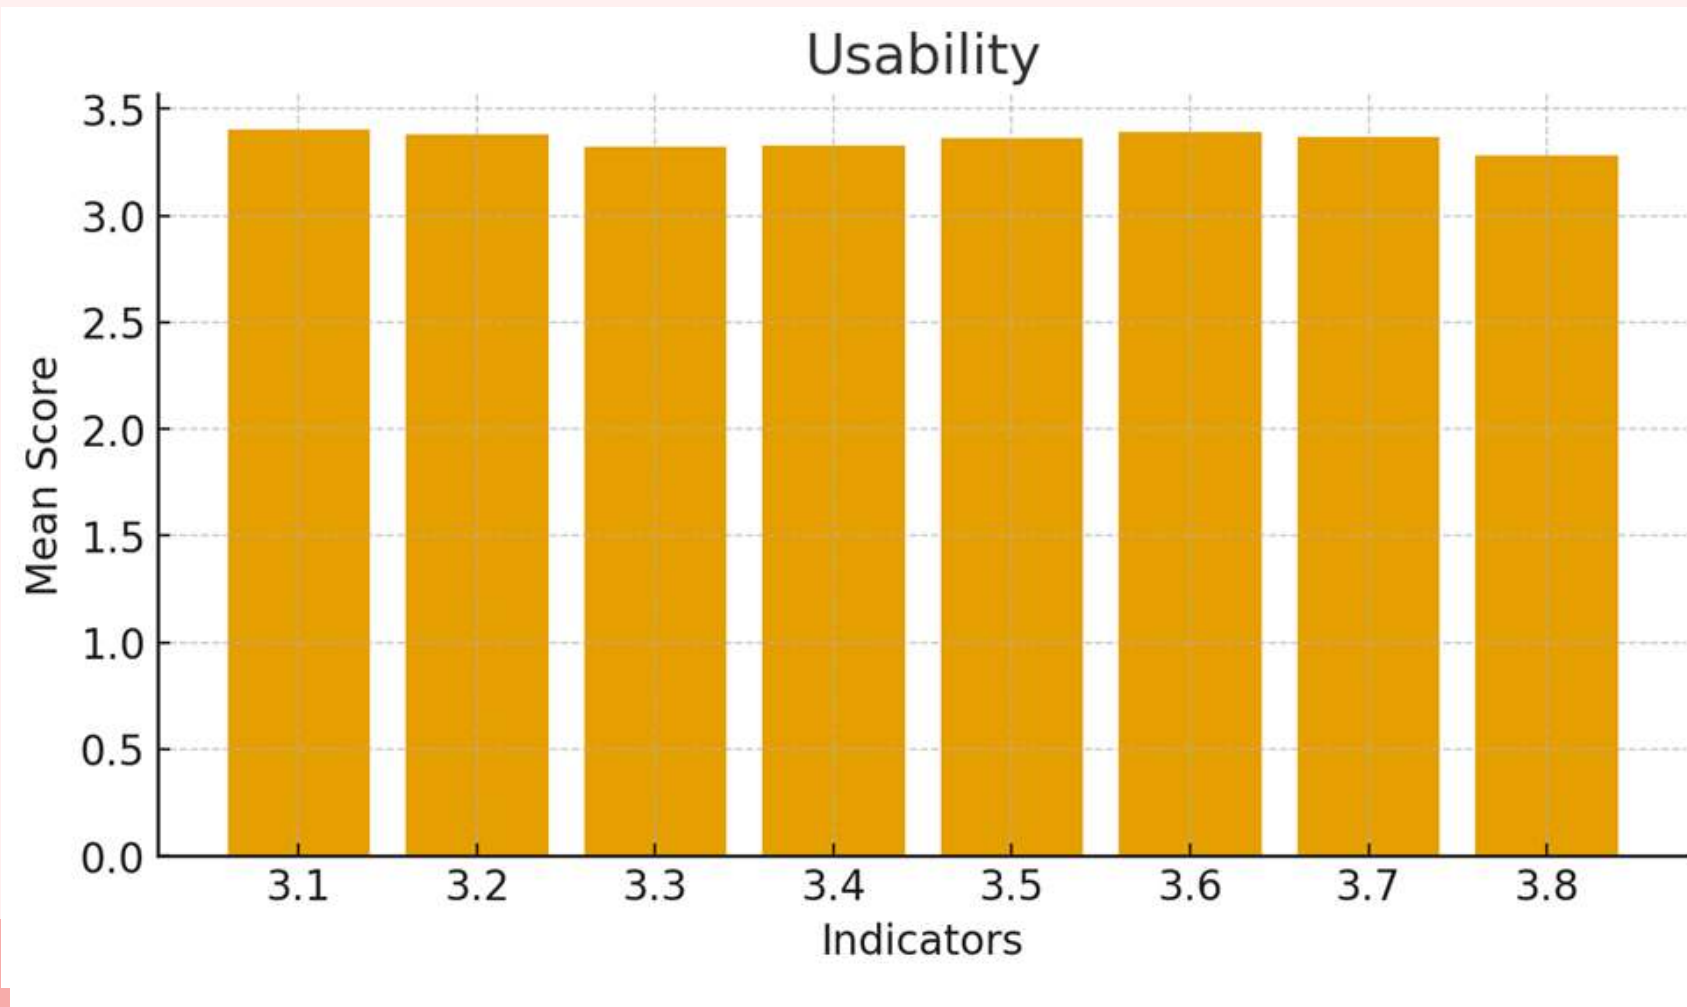

Objectives

- incorporate an e-commerce feature where customers can browse, order, and purchase products online, with automatic inventory updates
- create an inventory management module that allows users to add, update, and organize product information with essential details;
- adopt AI-driven demand forecasting to predict future product needs based on historical data;
- employ intelligent replenishment suggestions by analyzing sales trends;
- apply location-based analysis to evaluate sales performance based on geographic locations;
